

Sonoma County Fire Chiefs Association

Proposed Measure H: Sonoma County Fire Prevention & Response, March 2024

The Primary Goal: Provide for more efficient, effective, and sustainable fire response, paramedic services, and wildfire prevention and response capabilities that protect the health and safety of Sonoma County residents, business owners, and visitors.

The Problem

Like many counties in California, Sonoma County has faced major challenges in recent years when it comes to the critical funding needs facing fire services as we all prepare for future wildfire and winter storms impacts. The annual threat of both are now a reality that isn't going away, and the Fire Chiefs are concerned that the current County-wide fire service delivery structure, funding, and system structure isn't enough.

While our county grows and public safety demands increase, the public we serve needs and expects prompt, efficient and effective emergency service everywhere at any time. Our specific concerns include that the system is not meeting National Fire Protection Agency standards in all parts of the county. Several service gaps exist, especially in the more rural areas where there are currently extended response times to critical medical emergencies and vehicle accident victims. There are also significant delays in getting an effective firefighting force on scene to keep small fires from becoming major incidents.

The Solution

The Sonoma County Fire Chiefs Association has placed proposed Measure H on the March 2024 ballot. Proposed Measure H was written by local firefighters and fire chiefs, who believe the measure addresses a critical need facing Sonoma County and reflects their knowledge of the challenges and needs for fire protection.

If passed by voters, proposed Measure H would implement a 1/2 cent countywide sales tax that would generate an estimated \$60 million annually. All money raised by proposed Measure H will be spent in Sonoma County fire agencies to provide fire protection and emergency response services.

Strict financial accountability provisions, including oversight by citizens and local firefighters and chiefs and independent audits, will ensure money is spent properly, and that no funds are taken by the county, the state or used for any other purpose.

“The Sonoma County Fire Chiefs Association has invested significant resources into placing proposed Measure H on the March 2024 ballot. Proposed Measure H was written by local firefighters and fire chiefs, who believe the measure addresses a critical need facing Sonoma County. Proposed Measure H reflects our collective knowledge of the challenges and needs for fire protection.”

*- Chief Steve Akre, President,
Sonoma County Fire Chiefs Association*

Revenue Will Provide the Following to County Residents

Fire Chiefs recommendation: A regional plan based on population density, call volumes, station coverage, current service gaps, and special hazards to advance a comprehensive long-term strategy covering all jurisdictions:

- Improve emergency response times
- Increase wildfire prevention, preparedness, and response
- Expand paramedic services
- Staff up red flag and winter storm
- Provide staffing to rural and underserved communities
- Support an improved local 911 dispatch center
- Enhance vegetation management and fuels reduction
- Improve infrastructure
- Provide collaborative technology platforms

Proposed Governance of Expenditures:

- Representation from Fire Districts Association, Fire Chiefs Association, Taxpayers Association, Board of Supervisors Nominees, Mayors and Councilmembers Association Nominees, Citizen at Large, and Labor
- Oversight of expenditures entity, not a decision-making body
- Countywide funding will be distributed by the Sonoma County Fire Chiefs Association
